

Converter/Server

USB/RS-232/Ethernet/TTL → RS-485

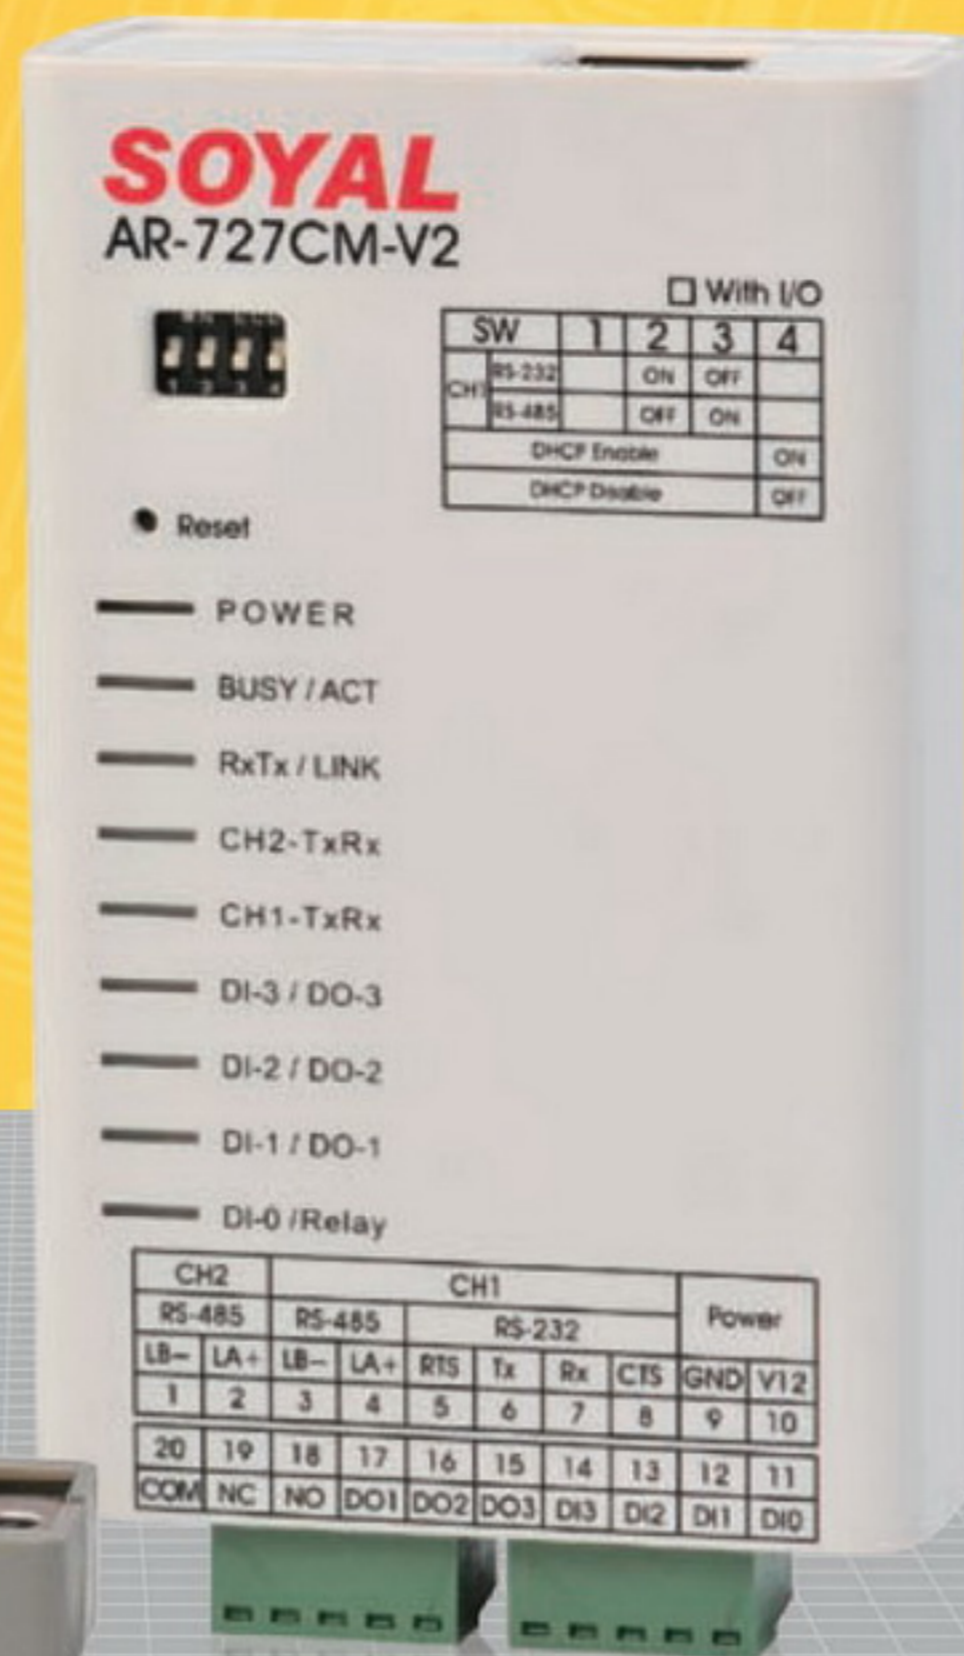

Isolated USB/RS-485 Converter

AR-321CM

Serial-to-Ethernet Networking Server

AR-727CM

TTL/RS-485 Converter

AR-321L485

Isolated RS-232/RS-485 Converter

AR-701CM

TTL/RS-485 Converter

AR-321DAX1

Features

AR-321CM

Isolated USB/RS-485 Converter

- Able to link readers and PC to achieve Networking Access Control
- Indicators for power and communication, for debugging and status
- Surge protection: 3 kV
- Electrical isolation: 2500V_{RMS}

AR-727CM

Serial-to-Ethernet Networking Server

- Controller connect directly to the networking, does not require conversion by the computer
- The serial ports include RS-485 and RS-232
- Able to link readers and PC to achieve Networking Access Control
- Network Protocols: ARP/ IP/ TCP Client/ UDP/ ICMP/ HTTP/ DHCP/ NetBIOS/ SNMP v1, v2, v3
- Indicators for power and communication, for debugging and status
- Surge protection: 16 kV

AR-701CM

Isolated RS-232/RS-485 Converter

- Data transmission direction auto control
- Able to link readers and PC to achieve Networking Access Control
- Indicators for power and communication, for debugging and status
- Surge protection: 8 kV
- Optical isolation protection: 2 kV

AR-321L485

TTL/RS-485 Converter

- Extension of readers, for display, lift control (AR-401R016B) and so

AR-321DAX1

TTL/RS-485 Converter

- Suitable for induction electronic door locks (AR-323D) networking function
