

## Unmanaged PoE Switch

Your networking made easy with LINK unmanaged PoE switch. With plug-n-play configuration, it is easy to turn IP Surveillance or AP on for your organization and homes. Operated at 0°C to 50°C should be placed for indoor application.

### Fast Ethernet PoE Switch (PoE 10/100Mbps)

**PSF-1004**  
4-Port Fast Ethernet PoE Switch (60W)

- Appearance with desktop/wall-mounting
- L2 unmanaged PoE switch with 5 x 10/100Mbps ports
- Provide 4 ports PoE function (802.3af/at)
- Delivering power up to 30W per port
- Support auto MDI/MDI-X and auto-negotiation
- Built-in IEEE 802.3x flow control protocol
- To provide easy installation with plug-and-play

**PSF-1008**  
8-Port Fast Ethernet PoE Switch (90W)

- Appearance with desktop mounting
- L2 unmanaged PoE switch
- Provide 8 ports 10/100Mbps with PoE function (802.3af/at)
- Delivering power up to 30W per port
- One Gigabit Combo ports for uplink
- Support auto MDI/MDI-X and auto-negotiation
- Built-in IEEE 802.3x flow control protocol
- Support Port Isolation Function
- To provide easy installation with plug-and-play

### Gigabit Ethernet PoE Switch (PoE 10/100/1000Mbps)

**PSG-3104**  
4-Port Gigabit Ethernet PoE Switch (60W)

- Appearance with desktop/wall-mounting
- L2 unmanaged PoE switch with 5 x 10/100/1000Mbps ports
- Provide 4 ports PoE function (802.3af/at)
- Delivering power up to 30W per port
- Provides 1 independent gigabit uplink port
- Support auto MDI/MDI-X and auto-negotiation
- Built-in IEEE 802.3x flow control protocol
- Support Port Isolation Function
- To provide easy installation with plug-and-play

**PSG-3124**  
24-Port Gigabit Ethernet PoE Switch (260W)

- L2 unmanaged PoE switch
- Provide 24 ports 10/100/1000Mbps with PoE function (802.3af/at)
- Delivering power up to 30W per port
- 2 Gigabit SFP ports for uplink
- Support auto MDI/MDI-X and auto-negotiation
- Support IEEE 802.3, IEEE 802.3u, IEEE 802.3ab, IEEE 802.3z standard
- Built-in IEEE 802.3x flow control protocol
- Built-in loop protection function
- Support port Aggregation function
- To provide easy installation with plug-and-play
- 1U, 19 inch rack mount with holder

## L2 Managed Gigabit PoE Switch (PoE 10/100/1000Mbps)

LINK L2 Managed Gigabit PoE Switches provide smart-managed and easy configuration for your business network that are "user-friendly" management and affordable. The switches are designed to provide up to 30W PoE power delivery for growing indoor surveillance and Wi-Fi solution demands which hold good for private businesses.

**PSG-5008**  
8-Port L2 Managed Gigabit PoE Switch (70W)

**PSG-5116**  
16-Port L2 Managed Gigabit PoE Switch (223W)

**PSG-5124A**  
24-Port L2 Managed Gigabit PoE Switch (400W)

### Total System Interfaces

PSG-5008  
8 Gigabit Ethernet with PoE + 2 Gigabit SFP

PSG-5116  
16 Gigabit Ethernet with PoE + 2 Gigabit SFP

PSG-5124A  
24 Gigabit Ethernet with PoE + 4 Gigabit Combo ports (4 x RJ45 and 4 x SFP)

### Features Highlight

- L2 managed PoE switch
- Can be managed and configured by web interface
- Delivering power up to 30W per port
- Support auto MDI/MDI-X and auto-negotiation
- Support VLAN (IEEE 802.1Q)
- Support STP/RSTP/MSTP
- Support Link Aggregation with LACP
- Provides QoS control based on IP DSCP
- Support IGMP Snooping V1/V2/V3
- Support DHCP Snooping and ARP Attack Prevention
- Support IPv4/IPv6 Client
- Provides IPv4 DHCP server
- Support LLDP/LLDP-MED
- Support Static IPv4 routing (Up to 32 static routes)
- 1U, 19 inch rack mount with holder
