Superior protection & Security

With the new Wireless Security System from DSC featuring the new ALEXOR wireless panel, you can be assured that you are receiving the finest home security system on the market.
With a wide range of complementary security devices, the system offers fully secure, 24/7 communication and complete protection.

What wireless means for you

As the system is wireless, it installs quickly with minimal compromise to your home or business structure. Its fast and easier installation means less time to install into your home or business - so you can get on with your day,

Control your system with confidence

Through the compact and sleek keypad, you control your security system. With easy to use one-touch keys, all family members can use the system with complete confidence. Handy wall or free-standing desk stand options give you more choice in there keypads can be located throughout the home.

Just a touch of a button

No more fumbling at the door with arms full of packages or worries about remembering security codes. The ALEXOR wireless key provides you with easy management of your security system. Full protection - at your fingertips.

Highest level of protection available

The ALEXOR will detect movement within the home, (without detecting pets), breaking glass on windows, Carbon Monoxide presence, smoke or fire, and flooding. When used with monitoring service, all devices are monitored to ensure your family and home is protected at all times. It is truly the highest level of protection available.

Emergency response

When an alarm is activates, a monitored Wireless Security System instantly connects to a monitoring station. Emergency services are dispatched as required by either internet or GSM/GPRS channels (the same communication method as your mobile phone).

PC9155AUS   ALEXOR 2-Way Wireless Panel
